Translation from Bulgarian

INSTRANSMACH, the joint Bulgarian-Hungarian company is involved in the design, assembly, supply, installment and commissioning of complex automated high shelving store houses, transport & distribution systems and in-plant transport.

Eng. ALEXANDAR BORISLAVOV IOTZOV has worked at INTRANSMACH from 04.11.1985 to 30.05.1987 at Assembly Supervision and Technical Service Laboratory Department. During this period he has held the following positions:

- engineer second degree in the Laboratory for Technical Service - from 04.11.1985 to 30.05.1987. There eng. Iotzov has worked on commissioning and handing over to the buyer of automated control systems for high shelving store houses and transport-distribution systems of INSTRANSMACH projects in Bulgaria, Poland, USSR, Romania. From 03.01.1987 eng. Iotzov attended a two-week training course for service maintenance of personal computers manufactured by IBM - PC/XT and PC/AT models;

- leader of a group of experts for commissioning and adjustment of automated control systems for high shelving store houses and transport-distribution systems from 01.06.1987 to 14.09.1987 at the same department and laboratory. There he organized and managed the commissioning and adjustment works at the plants of the joint Romanian-French car manufacturing company Oltcit in Krayova, Romania, Turbine Blades Plant and Leningrad Metal Works in USSR.

Eng. Iotzov performs his duties at a high professional level. He possesses profound knowledge of the software and hardware of freely programmable controllers of the type ISOMATIC 1001 and PROCON 72. He is well familiarized with the theory of the automated control systems for store houses and transportation processes. He knows in detail the algorithms of control computers of transportation vehicles. He uses Assembler programming language for the microprocessing

family MC 6800 and handles its hardware support. His work on commissioning of control programmes loaded on personal computers of the type IBM PC/XT and their compatibles show good mastering of the programming language „C“. Eng. Iotzov's knowledge in the field of relay contactor automatics allow him to carry out and manage commissioning and adjustment works starting from relay contactor automatics and ending with control computers and freely programmable controllers. His proficiency in English and Russian, as well as his experience working abroad are very helpful to him in his every day work, contacts with foreign experts and mastering of new technologies.

This reference is to serve for employment abroad.
